Digital Development Assistants

Ref. PUB-BFD-6 - c. £24,500 - £27,000 pa - Central London

New Horizon for BNF Publications

Making IT Work for prescribing

The British National Formulary (BNF) is a world-renowned, independent source of information on prescribed medicines.

To help with a programme of intensive digital development, we are recruiting **two** Digital Development Assistants to take a substantial role in:

- assuring the quality of digital BNF products;
- maintaining the BNF knowledge base using a bespoke XML-based content management system;
- contributing to the integration of the NHS *Dictionary of Medicines and Devices* and SNOMED CT coding schemes into the BNF knowledge base.

Opportunities exist to develop these exciting roles, helping to co-ordinate some of our projects and to maintain a range of key data components that will keep the BNF at the leading edge of developments in clinical information systems.

You should have experience of working in healthcare and preferably be familiar with using the BNF. A degree (or equivalent) in pharmacy, nursing or a life science would be beneficial but more important are a meticulous and systematic approach to your work, a sharp eye for detail, and the ability to work to a high level of precision and accuracy.

Benefits and how to apply

Attractive benefit package, including 25 days holiday, flexi-time and subsidised staff restaurant.

For a detailed job description and further information on how to apply please visit bnf.org/jobs or www.rpsgb.org or email recruitment@rpsgb.org

Closing date for applications: Monday 3 November 2008
